Infrastructure Modernization

Nutanix Cloud Clusters Design Workshop

BENEFITS

- Accelerate your adoption of the Nutanix platform by leveraging experienced consultants

- Lower risk with a comprehensive design document tailored to your specific requirements

- Identify requirements and considerations to successfully deploy and manage NC2

- Benefit from recommendations to prepare for and plan your NC2 deployment

- Gain understanding from comprehensive project documentation and knowledge transfer

OVERVIEW

Nutanix Cloud Clusters (NC2) Design Workshop is ideal for customers who are new to NC2 on Amazon Web Services (AWS) or Microsoft Azure. The workshop focuses on collaborating with customers to design a robust NC2 instance that meets your needs, increases time to value and decreases deployment risks.

NC2 Design Workshop → NC2 on AWS or Azure Deployment

SERVICE SCOPE

The Nutanix Cloud Clusters on AWS Workshop is designed to help you understand the implications and requirements for integrating NC2 on AWS or Azure with your existing on-premises Nutanix environment.

The NC2 Design Workshop addresses a single public cloud platform: AWS or Azure. If you plan to use NC2 on both AWS and Azure, you'll need to purchase an additional NC2 Design Workshop service.

The workshop's goals are to both educate attendees and provide recommendations for deploying NC2 on AWS or Azure solutions depending on the selected public cloud platform.

Workshop sessions address:
- The overall solution architecture
- AWS or Azure cloud connectivity
- Security and required cloud access controls
- Mapping of networking constructs from on-premises Nutanix to AWS or Azure
- Management plane and operational dependencies
- Provisioning methods and integration
- AWS or Azure resource access and usage

NUTANIX.

DELIVERABLES

- Project schedule
- Project status reports
- Product enablement session
- Completed NC2 Pre-Install Questionnaire
- High-level connectivity diagram
- Recommended solution diagram
- Knowledge transfer session
- Project close out

ADVANCED INTEGRATION & CUSTOM SERVICES

Custom engagements are available upon request.

TASKS

	Duration
NC2 Workshop for AWS or Azure	Typically 1 day
NC2 Workshop documentation creation	Typically 1 day
