Enterprise Architecture

Database Transformation Strategy KickStart

BENEFITS

- Maximize business outcomes with guidance and real-world expertise from an experienced specialist

- Deliver Database-as-a-Service (DBaaS) on your terms

- Accelerate database transformation by leveraging Nutanix innovation

- Avoid common pitfalls that result in critical design errors and overly complex architecture

AUDIENCE

- IT leaders and database teams seeking a tailored understanding of how to plan for and execute a successful database or desired outcome

OVERVIEW

The Database Transformation KickStart gives your database team the insights and practical guidance needed to achieve a successful database transformation or desired outcome.

Database Transformation Kickstart → Database Planning & Assessment Workshop → Database Design Workshop → Database Migration Workshop → NDB/Era Deployment

Upon completion of this workshop, your team will:
- Know the areas of consideration vital to achieving desired business outcomes from your database transformation
- Understand and know how to resolve challenges that stall database transformations
- Be able to plan and drive an optimized and efficient database transformation model
- Learn how Nutanix Database Service (NDB) helps you to run databases in a cost-effective environment that meets business requirements

SERVICE SCOPE

Delivered by an experienced specialist, this KickStart workshop starts with a Discovery session to understand your environment and required outcomes. Based on the information learned in Discovery, we'll then deliver a workshop customized to address your specific needs.

Potential topics:

Our specialists possess a broad range of expertise and can engage in depth with you on any number of relevant topics, such as:
- Learn how to free up critical database resources to perform higher value work
- Explore opportunities to automate database provisioning and management of operational activities like patching, upgrading and cloning databases

NUTANIX™

PREREQUISITES

- Knowledge of databases such as Oracle and SQL Server running on a virtualized platform is helpful, but not required
- Completion of a Discovery Questionnaire
- Discovery session prior to tailored workshop

- Identify where you can optimize cost through standardization, reduction of sprawl and simplification
- Develop efficient resourcing models so you can grow your database footprint without growing your database team
- Construct a DBaaS strategy for running databases in both public and private clouds
- Learn valuable data protection strategies that increase recoverability while minimizing storage costs
- Understand best practices that optimize database performance

DELIVERABLES

- Workshop slides and supporting enablement content

- Optimized customer strategy
  o Summary of relevant key concepts
  o Next steps to advance strategy

TASK

	Duration
Database Transformation KickStart Workshop	typically 2 hours delivered remotely
