

Enterprise Architecture

Self-Service Automation Strategy KickStart

BENEFITS

- Maximize business outcomes with guidance and real world expertise on how to accelerate your self-service automation initiatives
- Deliver self-service automation on your terms
- Increase agility and reduce repetitive IT operations
- Decrease time to value by understanding how to use Nutanix validated technologies to reduce business risk
- Understand how to implement a fully integrated and automated solution built to deliver a robust IT service that includes security, compliance and business continuity

AUDIENCE

- IT leaders and architects seeking a foundational understanding of how to plan and execute a successful self-service automation solution

OVERVIEW

The Self-Service Automation KickStart gives your team the insights and practical guidance needed to help organizations understand the benefits of a robust self-service automation architecture.

Upon completion of this workshop, your team will:

- Understand and prioritize the benefits of investing in self-service automation
- Be able to recognize and develop a robust self-service automation infrastructure
- Learn how a fully integrated automation solution can decrease your time to value

SERVICE SCOPE

Delivered by an experienced specialist, this KickStart workshop showcases leading-edge thought leadership by providing relevant, actionable insights into the critical area of self-service automation. Based on the information learned in Discovery, we'll then deliver a workshop customized to address your specific needs.

In addition to a high-level overview of self-service automation infrastructure architecture, the workshop introduces the decisions critical in driving successful strategies and efficient operations.

Potential topics:

Our specialists possess a broad range of expertise and can engage in depth with you on any number of relevant topics, such as:

- Understand and prioritize the benefits of implementing a self-service automation strategy
- Learn the benefits of creating a true private cloud in a hybrid cloud world
- Avoid common pitfalls with self-service automation

PREREQUISITES

- Knowledge of IT infrastructure and virtualization is essential to a meaningful experience
- Completion of a Discovery Questionnaire
- Discovery session prior to tailored workshop

DELIVERABLES

- Workshop slides and supporting enablement content
- Optimized customer strategy
 - Summary of relevant key concepts
 - Next steps to advance strategy
- Nutanix Validated Design (NVD) document

- Understand the importance of adopting a product mentality when implementing self-service automation
- Learn how to implement as-a-service offerings on premises

TASK

	Duration
Self-Service Automation KickStart Workshop	typically 2 hours delivered remotely
