

# Virtual Desktop Modernization

## EUC User Migration Service

### BENEFITS

- Accelerate your adoption of the Nutanix platform by leveraging experienced consultants
- Lower migration risks by following a comprehensive plan tailored to your specific requirements
- Gain understanding with comprehensive project documentation and a knowledge transfer session

### OVERVIEW

The End User Computing (EUC) User Migration service focuses on collaborating with customers to execute an existing desktop transformation migration plan. This accelerates solution adoption and movement of users and data into the new environment.

A certified Nutanix consultant reviews and executes an existing user migration plan to ensure that migration requirements are identified and met while adhering to Nutanix- and industry-recommended best practices and minimizing cost and complexity.

### SERVICE SCOPE

Execute the migration plan developed in the EUC Migration Planning service. The service is designed to migrate users and their associated data from an existing physical or virtual desktop environment to the Nutanix-based EUC solution.

The migration service facilitates data movement from existing desktops or RDS hosts to new storage infrastructure. It makes use of policies and profile-related tools to migrate user data.

EUC User Migration is a fixed-outcome service with options to order in defined 'packs' of up to 5 users or migration policies per pack. Each pack supports the migration of 5 individual users with up to 50 Gb of data per user, or a configuration of up to 5 GPO-based policies to support automated migration. Should you need to accommodate larger quantities of user migrations, you'll need to purchase additional packs until your migration needs are met.

---

## PREREQUISITES

- An existing user migration plan that specifies the solution end state and the method and timing of each migration
- The migration plan must identify the users who need to be migrated and policies to be created

---

## DELIVERABLES

- Project schedule
- Project status reports
- Migration of existing users or user data
- Post-migration validation plan results
- Project close out

### Migration Service:

- Review and verify migration requirements, constraints, assumptions, dependencies and decisions for the migration effort, as documented in the existing plan
- Deploy data migration tools as required for the migration plan
  - Customer is responsible for providing required tool licensing
- Configure AD and storage infrastructure settings as required for the migration plan
- Execute the agreed upon migration plan, process and migration waves (optional)
- Execute the agreed upon post-migration validation plan

---

## TASK

	Duration
EUC User Migration Service (5-policy pack)	Typically 2 days

---
