Infrastructure Modernization

Intelligent Operations Design

BENEFITS

- Accelerate your adoption of the Nutanix platform by leveraging experienced consultants to assist with designing and planning automation

- Lower risk with a comprehensive plan tailored to your specific requirements

- Take advantage of comprehensive project documentation and a robust knowledge transfer session

OVERVIEW

Nutanix Intelligent Operations (formerly Prism) Design focuses on collaborating with the customer to create a design and deployment plan for automating infrastructure and virtual machine (VM) operations on Nutanix Hyper-converged Infrastructure (HCI). The goal of the service is to streamline and accelerate solution deployment and adoption while enabling business outcomes

A certified Nutanix consultant designs and plans automation to ensure that requirements are identified and the proposed solution meets your business needs. Our experienced consultant ensures adherence to Nutanix- and industry-recommended practices while minimizing cost and complexity.

SERVICE SCOPE

Create a design/plan for deploying Nutanix X-Play automation and playbooks to automate common tasks within your current Nutanix-based infrastructure.

This fixed-outcome service is consumed in defined 'packs' of 10 automation actions per pack. For each pack purchased, Nutanix Services designs and plans up to 10 action policies or playbooks. Multiple packs must be purchased to accommodate larger quantities of action planning/design.

Design service includes:
- Gather and document solution requirements, constraints, assumptions, dependencies and decisions.
- Conduct workshop with an overview of the technology and capture the targeted use cases and actions
- Create a detailed implementation plan that defines the triggers, workflow actions and playbooks

Note: Built-in actions are included. Scripted solutions requiring custom scripts to be developed aren't included in this service but can be accommodated via a custom statement of work (SOW).

NUTANIX™

PREREQUISITES

- One or more Nutanix clusters
- Stakeholder availability to attend workshops
- Deployed Intelligent Operations with Prism Pro or NCM Pro licensing
- Integration via webhook

DELIVERABLES

- Project schedule
- Project status reports
- Requirements gathering and design workshops
- Architecture requirements and design documents
- Configuration workbook
- High-level Design/Migration presentation
- Solution Deployment/Migration Plan
- Solution/Migration Test Plan
- Project close out

Note: This offer is available with tiered documentation, defined here **https://www.nutanix.com/support-services/consulting-services/documentation-tiers**

TASK

	Duration
Nutanix Intelligent Operations Design (action pack of 10)	Typically 3 days
